1. The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a tunable receiver having the combinations as claimed, including a plurality of tracking filters, each tracking filter having a center frequency that is digitally tunable over a respective frequency range, a first plurality of switches, each coupled to the input of a respective tracking filter to couple an RF signal to a selected one of the tracking filters and a second plurality of switches, each coupled to the output of a respective tracking filter, to couple an RF signal from the selected one of the tracking filters to the mixer to convert the RF frequency to a predetermined frequency, as recited in the claims. In addition, the prior art fails to show or fairly suggest a method of operating a television receiver having the combinations as claimed, including providing channel select control instructions to an integrated circuit, and in response to the control instructions and on the integrated circuit, digitally tuning a respective tracking filter in accordance with the channel selected by the channel select control instructions, setting the frequency of a local oscillator coupled to a mixer to shift an RF frequency corresponding to the channel selected to a predetermined intermediate frequency, directing a television RF signal to the respective tracking filter, and mixing the output of the respective tracking filter with the frequency of the local oscillator to shift the RF frequency of the selected channel to the intermediate frequency, as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
